Benefit from Expert Clinical Knowledge for your Daily Practice

INTRODUCTION

GSD ACADEMY

GSD Academy is a modern and certified training center in Lisbon (Portugal) with a high level of technical and scientific knowledge, that offers implantology courses for dental health professionals who wish to learn more and have an enrich experience.

It acts according to quality criteria, strives for excellency not only in its team of instructors but also by choosing the best materials, techniques and technology.

All the courses include theoretical presentations scientific evidence-based, enhanced by clinical hands-on procedures in patients – the key to clinical success and directly supervised by the team – and group discussions that allow a personalized learning.

In addition to the courses, GSD Academy develops other related events, meetings, support programs for clinicians and research.

SPEAKERS / INSTRUCTORS

Gonçalo Seguro Dias

- Graduated in Dentistry (School of Dentistry, Lisbon University)
- Oral Surgery Specialist (School of Dentistry, Lisbon University)
- PhD Student in Oral Surgery (School of Dentistry, Lisbon University)
- Assistant Teacher for Surgery and Oral Medicine (School of Dentistry, Lisbon University)
- Director GSD Academy – Advanced Training Programmes for Dentists
- Researcher at Oral and Biomedical Sciences Research Unit (UL)
- Former Resident of the Periodontology and Implantology Service (School of Dentistry, Columbia University, New York)
- Author of several Published Articles

Mariana Ribeiro

- Graduated in Dentistry (School of Dentistry, Lisbon University)
- Post-graduation in Teaching Methodologies in Oral Surgery (School of Dentistry, Lisbon University)
- Post-graduation in Aesthetic Dentistry (Clínica Aparício, Barcelona and University of Gothenburg)
- Co-Author of several Published Articles

António Cebola

- Graduated in Dentistry (School of Dentistry, Lisbon University)
- Student of Oral Surgery Specialization (School of Dentistry Lisbon University, PT)
- Post-graduation in Teaching Methodologies in Oral Surgery (School of Dentistry, Lisbon University)
- Post-graduation in Periodontology (ISCEM)
- Co-Author of several Published Articles

BASIC IMPLANTOLOGY

Dates		Duration	Fee	Available Places
March	10 th - 16 th	7 Days	EUR 3'800 + VAT	8
June	2 nd - 8 th	56 Verifiable CPD hours	GBP 3'420 + VAT	
September	22 nd - 28 th			
November	24 th - 30 th			

This intensive course enables the clinician to develop essential skills for achieving excellency in implantology. The goal is to acquire knowledge, increase the clinical experience level, or recycle and acquire greater know-how, through intense work with patients.

Target Audience:

General dentists, Stomatologists, Odontologists, Maxillofacial Surgeons, Implantologists, Periodontologists, Prosthodontics

THEORETICAL PROGRAMME 24h

- 1. STATE-OF-THE-ART**
 - Implantology today
 - Implant options
 - Implant surface
 - Surgical technique vs bone quality
 - 2. ANATOMY AND SURGICAL LANDMARKS IN IMPLANTOLOGY**
 - Anatomy applied to implantology
 - Important anatomical landmarks
 - Surgical protocols in implantology
 - 3. GUIDED BONE REGENERATION**
 - Biomaterials: guidelines and options
 - Resorbable vs non resorbable membranes
 - Graft options
 - Extraction socket preservation techniques
 - 4. PLANNING AND DIAGNOSTICS IN IMPLANTOLOGY**
 - Planning according to biology
 - Tridimensional evaluation
 - Radiological and tomographical (3D) interpretation
 - Clinical case discussion
 - 5. IMPLANT PLACEMENT SIMULATION**
 - Implant placement on artificial mandibles
 - 6. FUNDAMENTAL PRINCIPLES OF IMPLANT SUPPORTED PROSTHESIS**
 - Prosthetic components
 - Types of rehabilitation
 - Screw retained vs cemented retained prosthesis
 - Temporary prosthesis
 - Prosthodontic complications
 - Occlusion considerations
 - 7. FULL ARCH REHABILITATION WITH IMPLANTS**
 - Overdentures
 - Retention systems
 - Fixed versus removable prosthesis
 - 8. PROSTHODONTIC PROCEDURES SIMULATION**
 - Clinical aspects: Impressions, try-in, insertion
 - Maintenance protocol
 - Impressions on artificial models – unit/multiple
- ## **HANDS-ON 32h**
- 9. IMPLANT PLACEMENT SURGERIES**
 - Practice in patients (6 to 8 implants)
 - 10. PROSTHODONTIC APPOINTMENTS**
 - Practice in patients

IMMEDIATE IMPLANTS

Dates		Duration	Fee	Available Places
March	12 th - 14 th	3 Days	EUR 3'000 + VAT	4
June	4 th - 6 th	24 Verifiable CPD hours	GBP 2'700 + VAT	
September	24 th - 26 th			
November	26 th - 28 th			

During this three days intensive course clinicians will learn all the surgical protocol steps used in immediate implants rehabilitation in posterior and anterior areas. The goal is to diagnose complex situations and control all the clinical complications. The clinicians will watch live surgeries and perform the surgeries in patients.

Target Audience:

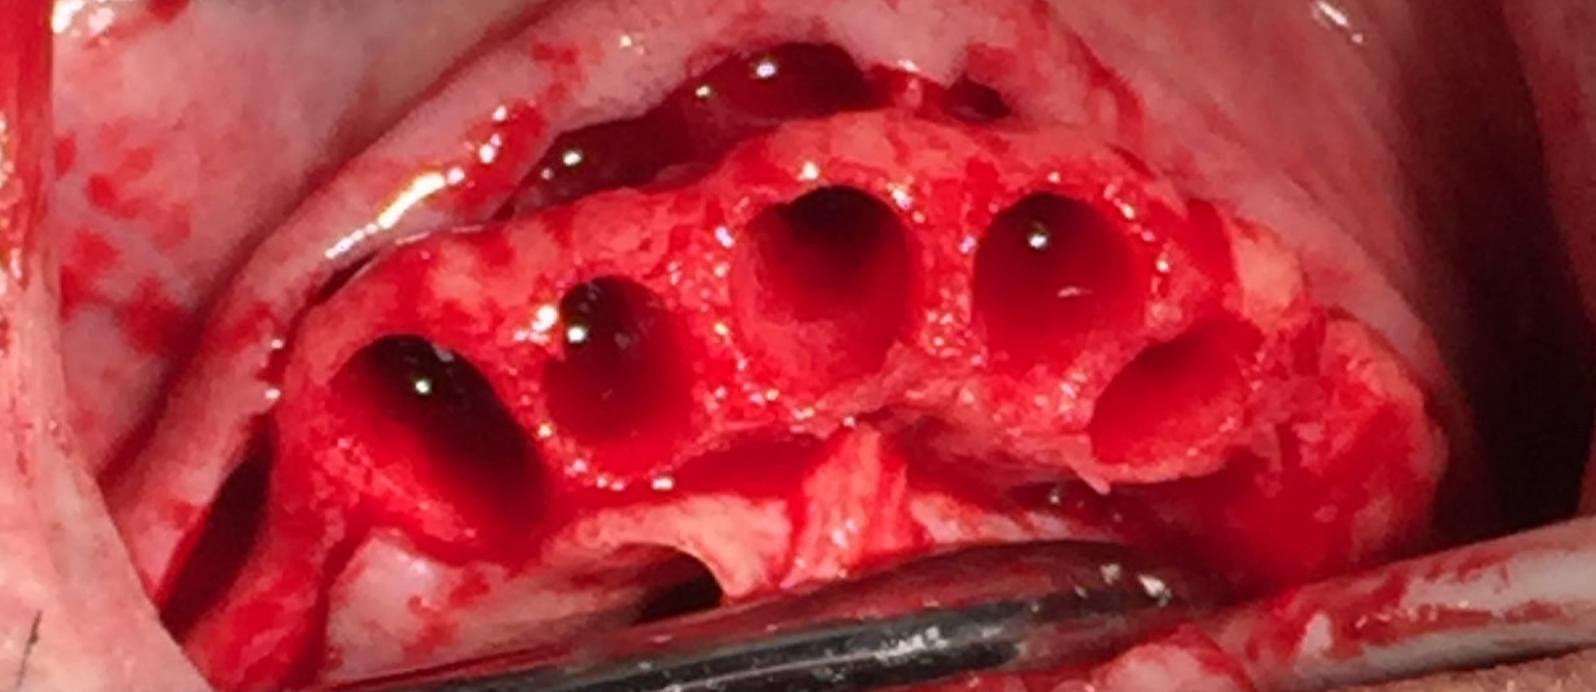

Implantology professionals with an academic and professional curriculum compatible with the adequate experience degree.

THEORETICAL PROGRAMME

- Immediate implants protocol according to patient features: indications and limitations
- Immediate implants in anterior and in posterior areas
- Impressions, methods, and elaboration of temporary restoration in aesthetic areas
- Criteria and timing for the definitive rehabilitation

HANDS-ON

- Immediate implants placement surgeries (2 surgeries)
- Prosthodontic procedures for temporization in aesthetic areas

IMMEDIATE LOADING

Dates		Duration	Fee	Available Places
March	12 th - 14 th	3 Days	EUR 3'000 + VAT	4
June	4 th - 6 th	24 Verifiable CPD hours	GBP 2'700 + VAT	
September	24 th - 26 th			
November	26 th - 28 th			

Immediate load for full arch rehabilitation patients has advantages well known. It is in many situations the only available option to perform on patients. This course will focus on all stages of the procedures and decisions to be made, from treatment plan to the final denture. At the end of this course, you should be able to recognize the ideal treatment plan according to patient features.

Target Audience:

Implantology professionals with an academic and professional curriculum compatible with the adequate experience degree.

THEORETICAL PROGRAMME

- Immediate load protocol according to patient features: indications and limitations
- Pre-operative planning
- Immediate load: impressions, methods and elaboration of provisional restoration
- Criteria and timing for the definitive rehabilitation

HANDS-ON

- Immediate load surgeries (0.5 or 1 surgery)
- Prosthodontic procedures for temporary prosthesis

SINUS LIFT

Dates		Duration	Fee	Available Places
March	15 th - 16 th	2 Days	EUR 3'000 + VAT	4
June	7 th - 8 th	16 Verifiable CPD hours	GBP 2'700 + VAT	
September	27 th - 28 th			
November	29 th - 30 th			

The posterior maxilla resorption along with sinus pneumatisation is a challenge in implant restorations. Sinus lift technique allows the resolution of these clinical problems, restoring the vertical bone dimension required for dental implant placement. This course will focus on the biological bases for surgical procedures, techniques and biomaterials to be used.

Target Audience:

Implantology professionals with an academic and professional curriculum compatible with the adequate experience degree.

THEORETICAL PROGRAMME

- Sinus lift techniques in the rehabilitation with dental implants on atrophic jaws
- Indications and complications

HANDS-ON

- Sinus lift surgeries (1 or 2 surgeries)

GENERAL INFORMATION

Location: GSD Academy
R. Duque de Palmela 30, 2ª
1250-098 Lisbon
Portugal
www.gsd-academy.com/en
www.facebook.com/gsdacademy

Courses include:

- Certificate for verifiable CPD
- Documentation
- Materials for procedures
- Coffee breaks
- Course dinner

Course language: English

Notes: The Organization reserves the right to change dates and schedules of surgeries.
