

mollosil®

the reliable direct soft liner

- permanent relining material for chairside use
- bonds absolutely firm to all denture acrylics
- manual mixing, no waste of material
- 100 % biocompatible, taste- and odourless

Also available as Starterkit!

tempofit® duomix

for temporary crowns and bridges, self curing

surprisingly easy

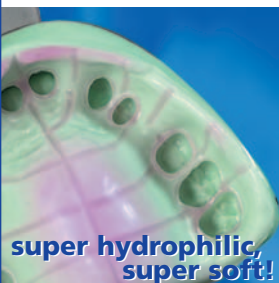

- easy handling, perfect dispensing
- no waste of material
- rational and convenient to use
- the logical alternative to conventional tubes and cartridge systems

the first **handmix** in a **synchronous-dispenser**

hydro

hydrophilic C-silicone

super hydrophilic, super soft!

- for the two-step and one-step putty-wash technique
- very smooth consistency
- precision and dimension like A-silicones
- visual check of measuring and mixing through colour safety system
