

# 3D Implantology

## Power up your practice with the latest technologies!

3D Implantology is a two-day event covering each step in the implantology digital workflow including treatment planning, guided surgery, and the design of CAD-CAM custom bars and abutments. An intensive hands-on workshop, utilizing individual monitors with Anatomage "Passage" Surgical Guide Starter software and other amenities at the Implant Direct Educational Center, allows you to complete a simulated case from start to finish.

This advanced implant course is **designed to take you from beginner to advanced level and from placement of a single implant to full mouth restoration** with an emphasis on treatment planning using CT technology.

Dentistry by Dr. Gary O'Brien

Subjects covered include working with DICOM files, proper identification of anatomical structures, nerve mapping, surgical and prosthetic considerations for the ideal selection of implants and their location, ordering the surgical guide, hands-on use of the surgical guide, designing and ordering the CAD CAM Bars for optimum case acceptance, custom CAD abutments for your patients, Teeth-in-1 Day with fixed hybrid restorations, and much more.

Presented by *Dr. August de Oliveira* and *Dr. Gary O'Brien*, this course will prepare you for a smooth transition into the future of implantology.

August de Oliveira,  
DDS

Gary O'Brien,  
DDS
