

# Implant Dentistry 101

## For GPs by GPs

at the new Implant Direct Educational Center · Las Vegas, NV

We know implant dentistry can seem daunting. We've been there. That's why we decided to develop a course especially for general practitioners; taught by general practitioners.

We'll cover treatment planning for single and multiple tooth replacement procedures, the basics of implant surgery and prosthetic selection as well as the role of bone augmentation. With lectures, discussions and hands-on training, this three-day course will leave you with a clear understanding of how implant dentistry fits into your practice.

*"I really enjoyed the 101 course. The facility is awesome and the quality of the course was way above par. I'll be taking more courses in the future."* - recent attendee
