MICRO-VIBES

AN INCREDIBLE REVOLUTION AND A HUGE ADVANTAGE IN YOUR EVERYDAY TECHNIQUE

Micro-Vibes is a multi-purpose tool of a new and innovative conception. Thanks to a micro-motor equipped with an excentric weight, it provides a unique micro-vibration which can be directed and controlled. A fantastic advantage for:

- porcelain mixing: homogenizes the

grains, helps to extract all micro-bubbles;

- local interdental condensation for closing tearings and gaps after the first firing of porcelain;

- extremely thin and regular application of materials like powder opaques,

paste-opaques, liners for zirconia;

- mixing and/or activation of pre-mixed materials like paste-opaques or paste stains;

- helps the insertion of crowns and bridges onto the model.

DESCRIPTION

MICRO-VIBES, instrument with universal flexible spatula

MICRO-VIBES, instrument with Al₂O₃ bead for paste-opaques

All spare parts and 1.5V batteries are available separately

Item no.

01000-MVS

01000-MVOP
