

For a good morning...

the fresh solution for an every day problem
with dentures

"All cold-curing A-silicone based denture relinings tend to accumulation of plaque" (Prof. Dr. Welker, Dr. Göbel, University of Jena, Germany, Dental Prosthetics and Materials' Science Department)

Now available:

good morning spray

The antibacterial spray solution inhibits plaque and delays accumulation of oral microorganisms for 24h. Mild and gentle, without interfering with the natural oral flora.

From now on each standard package of mollosil® plus contains 5 x good morning spray, free for your patients.

mollosil® plus
