

Fits like a glove: the NEW premium temporary

almost too good
to be true

tempofit® premium

self curing 10:1 composite for premium provisionals

Top formulation with exemplary material properties due to a novel resin matrix, for high aesthetic short and long term provisionals

- **exceptional bending strenght**, highest pressure and abrasion resistance
- optimal consistency (e.g. low displacement resistance) and minimal dimensional change during polymerization for precise adaptation and fitting
- **minimal polymerization temperature**
- defined elastic phase for reliable removal of the provisional
- brilliant, translucent colours for a exceptional natural aesthetic and fluorescence, even in different lighting conditions
- **absolutely colour stable** for complete time of wearing
- easy surface finishing, excellent grinding and polishing
